Sprint Retrospective Report

Date Submitted: 3/26/2024

Team: 2

Report Created By: Aaron Hanson

For Sprint: 4

List the goals your team set for this sprint. It is best to name specific features or bug fixes; use the exact issue titles from the GitHub issue tracker. (*Add more rows if you need*)

Issue Title	Assigned To	Status (Complete, Incomplete, Not Started)	Comments (e.g., reasons why feature is incomplete)
Search Sources by tags(functionality and UI)	Aaron	Incomplete	Feature is incomplete because I was not sure that I was going to do the UI for it.
Add and delete tags(Functionality)	Aaron	Complete	
Display Youtube videos on desktop	Craig	Incomplete	Tried many ways to do it and none of them worked.
Add and Delete Tags	Steven	Complete	

For each team member, please provide (via copy/paste) 2-3 examples of evidence they are actively contributing to the development of the team (beyond just coding, etc.). These could include:

- A git commit message (please include the commit ID and date/time)
- A comment on an issue in the issue tracker (please include the issue name)
- A bug issue they opened (please include the issue name)
- Message(s) from Slack, Discord, etc.

The examples must be substantive, e.g.,

- explaining why a change was made
- providing detail as to how to reproduce a bug
- suggest options to the team for how to solve a particular problem

Team Member	Example Communication(s)
Aaron	All server work is done now. I am working on adding all functionality to the library that can be called by the web and desktop I should be done in a little bit then I can help update documentation before the meeting at some point
Steven Kight	Implements adding and removing tags from a note in the desktop client using db and server changes from Aaron. Implemented an algorithm to manage tags for a

	note by seeing if the notes tag exists in the tags table and if not, it gets added, and then it gets the id of the tag and adds that to the note_tags table if and only if it wasn't already there.
Steven Carr…	Still unable to get it to convert properly it'll convert the string. and then it will "save" but save the whole thing as null I think its how I am currently converting the string so I am going to try some other ways to see

List your team's goals for the next sprint. (*Add more rows if you need*)

Priority	Issue Title	Assigned To
1	Finish searching sources by tags with multiple tags	Aaron
1	Clean up web ui for notes	Steven Kight
1	Address other issues noted in demo	Steven Carriger
